

Video Conferencing at 7 Bedford Row

7 Bedford Row has combined with BT to provide a state-of-the-art high tech video conferencing system to support clients with the ever increasing demands on their time.

The system is installed in our new video conferencing suite next to our seminar suite in Chambers.

- **A 50" inch plasma screen** combined with a multipoint codec, high resolution camera and supported by 6 ISDN lines together with a high-speed IP connection maximise the sound and picture quality.
- **The multi-point system** enables chambers to connect to four different sites at once.
- **Plans, x-rays, diagrams** can be viewed on screen and transmitted at high resolution.
- **Connection** - Solicitors and experts can connect to the system from their own laptop or desktop computer.
- **Seminars** - can be viewed from any desktop or laptop whilst they are taking place in chambers.

Many people are already making wide use of the facility which cuts down on the time and money that solicitors, counsel and experts have to spend travelling.

Our barristers will continue to travel to see lay and professional clients but where time is of the essence or it is more convenient for clients the new videoconferencing suite will be available.

For any further information or to discuss your requirements, please do not hesitate to contact clerks@7br.co.uk
