

Dr Nelly Ninis, Consultant Paediatrician. MBBS. Msc.MRCP.MRCPCH.MD

I am a Consultant Paediatrician at St Mary's Hospital London. I have been a doctor for 30 years, in Paediatrics for 28 years

I have completed sub-speciality training in Paediatric Infectious Diseases in London

I completed a Master's Degree in Tropical Medicine at the London School of Hygiene and Tropical Medicine in 1990

Academic: I completed a period of academic training which led to my doctoral thesis. I undertook a major national research study into meningococcal disease (meningitis and septicaemia) in childhood. I ran a multi-centre study aimed at understanding the role of healthcare delivery in the outcome of meningococcal disease in children in the UK. This research has led to major publications on the symptoms of MD prior to hospital admission and also the first paper to show that inadequate early care leads to a worse outcome.

- I was a member of the Guideline Development Group at NICE on the bacterial meningitis and septicaemia guideline 2010.
- I am chief author and editor of the Royal College of Paediatrics and Child Health e-learning on meningitis and septicaemia
- I am a co-applicant on the Neomen Study of neonatal meningitis in the UK and chief author of the Neonatal meningitis e-learning for the Royal College of Paediatrics and child health
- In 2018, I produced the Flag ship educational film on sepsis in children for Health Education England.

I have 8 years' experience in clinical negligence work, both defence and claimant work (50:50 split) . I have appeared in court twice for clinical negligence cases, one in the UK and once in Ireland. I work for the Public Health Ombudsman and have given evidence in Coroners courts on a number of occasions. I am on the MDU cases committee.
