

Prof. Saul Myerson MB ChB MD FRCP FESC

I am a consultant cardiologist at the John Radcliffe Hospital, and an associate professor at the University of Oxford. I am a specialist in diagnostic testing, and head of cardiac imaging and physiology in Oxford, with particular expertise in cardiovascular magnetic resonance. My clinical and research interests are in heart valve disease, aortic disease and cardiomyopathies. I have published widely (>100 papers), given many national and international lectures and am editor of the Oxford Handbooks of Cardiology Emergencies, Valve Disease and Cardiovascular Magnetic Resonance. I qualified from the University of Bristol and completed further training in London and Oxford.

I provide expert reports on all areas of cardiology including coronary disease, heart valve disease, cardiomyopathy, and aortic disease. I produce 50-100 reports a year, for both claimant and defence teams, including many national solicitors, the Medical Protection Society and Medical Defence Union, and I am also an expert witness for the GMC. My experience includes civil cases, employment tribunals, criminal cases and the Court of Protection. I have undertaken Bond-Solon expert witness training, and am a holder of Cardiff University-Bond Solon expert witness certificates in both civil and criminal law.
