

Finn Stevenson – Speaker

Finn specialises in the development and commercialisation of disruptive digital health products. He has held a number of senior roles within the surgical robotics industry, including most recently as Head of the Spine Surgery Business at Advanced Osteotomy Tools (AOT), a Swiss startup developing a novel surgical robot using powerful cold laser technology to cut bone. Prior to AOT, Finn held senior product strategy, marketing, and sales roles at CMR Surgical as part of the commercialisation of Versius, the first British robot for keyhole surgery. Finn studied medicine at the University of St Andrews, and also holds an MSc in Musculoskeletal Science from University College London with a research focus on spine surgery.
